

1.It is my belief that Air 1 serves my local community with guidance and reassurance. It enables one to view the world with instead of desparity. My community benifits through powerful message sent, HOPE.

2.The community will be affected morally, when the only choice of radio is one of discouragement, immorality, and ultimate pessimism produced by so many of the current pop/alternative/R&B stations.

3.The services rendered by AIR 1 are without a doubt in the public's interest, simply because it offers a wonderfully positive message for the youth and adult population.
